

The Judas Factor

After from an emergency light aircraft landing in a remote Scottish forest, Simon Denchfield and Ellen Philips, his student pilot, find themselves in a situation that seems normal from the outside, but is far from that. Returning to their airfield near Bristol the following day the pair suspect they have touched something politically sinister, especially when on another flight over a forested area on the Mendips Hill, Denchfield spots activities not associated with the arboreal industry. Investigating further he discovers that Yandall-Yates, the chairman of the Forestry Commission, is none other than a retired army general who once advocated the formation of a private army to offset growing civilian unrest inspired by union and communist inspired plans to take over the British government by extra-political activities. Curiosity is further aroused when Denchfield and Ellen spend the weekend at Castle Oldfield where they meet Yandall-Yates and enter political discussions leading to an invitation for Denchfield to meet Roy Harkins, the British socialist President of the European Commission, in Brussels. Harkins, nearing the end of his presidency, has ambitions to return to British politics, but not to his old socialist party now heavily infiltrated by communist activists. He leans towards social democracy, a political doctrine Denchfield also supports. Following the meeting Denchfield gives up his flying job to help Harkins form the new National Democratic Party by acting as its national figurehead ready to move over when Harkins vacates his European position. While Denchfield becomes party chairman and strives to set up a fully functional NDP, Yandall-Yates makes other plans. Reluctantly Denchfield agrees to lead a successful armed take-over of the government on the understanding that Roy Harkins is named leader and take full responsibility for the next stage.

That does not happen. Supposedly crippled with a broken leg Harkins orders Denchfield takes on the role until he is fit. As party chairman Denchfield decides he likes the task and begins moving the party in opposition to Harkins stated wishes. Never popular amongst the new partys senior members because of his imposed status; Denchfield nevertheless decides he must risk attending a G7 meeting in New York and speak at the United Nations. He does both, but on the return flight he is arrested and returned to England as a prisoner where the NDP have been replaced by the ousted government with the approval of Roy Harkins and Yandall-Yates. Sent to trial as a traitor Denchfield is condemned to death while many of his supporters are rewarded with state honours and accept jobs under the new administration. Imprisoned in the Tower of London, Denchfield is rescued and flown abroad.
